1.) I understand that it is my responsibility to contact my physician for my results. 2.) I authorize ABI to mail information to me and to identify themselves when leaving a phone message. 3.) I understand that I am responsible for payment of all charges resulting from this visit. 4.) The Radiologist and Pathologist bill separately from ABI. 5.) I have been informed that some insurance carriers will only pay for one screening mammogram every 365 days. 6.) I am aware that any diagnostic studies may be subject to my deductible and/or not covered by my insurance policy. This includes screening mammograms that turn into diagnostic mammograms. 7.) If I elect to have my insurance filed ABI, I give irrevocable authorization that this be done with signature on file. A photo static copy will serve as the original. 8.) I authorize ABI to release or request copies of medical records and x-rays pertinent to the course of my examination. 9.) I certify that I have read and received this information prior to my diagnostic Imaging exam and that I understand it's contents.

I hereby assign any and all right, title, and any interest in any benefits whatsoever of any insurance policy or policies whatsoever to AB for charges of services and expenses rendered and provided by them. I further agree to, and will pay for all charges and expenses not provided for or covered by my insurance. I further authorize ABI Comprehensive Breast Center to release any and all information acquired by them in the course of my treatment.

# Mammography Disclosure and Consent

You have the right as a patient to be informed about any diagnostic procedure that might involve even though minimal, any risks or complications. This disclosure is not meant to frighten or alarm you, it is simply an effort to make you better informed. X-ray examination of the breast (mammography) is the most accurate method of detecting breast cancer. You should understand, however, that a mammogram is not 100% effective in detecting all breast cancers. Some cancers may be seen on the x-ray study but cannot be felt on physical examination. Other cancers can be felt on physical examination, but cannot be seen on x-ray study. It is estimated that 10% of cancers cannot be detected by the mammogram in certain types of breasts. A negative or normal mammogram does not completely exclude the possibility of breast cancer. Additional views of your breast may be requested by the radiologist. We will call you if this is necessary. It does not mean that your mammogram is abnormal. If you have not had a recent breast examination by a health professional prior to the mammogram, you must contact your doctor for a breast examination. Please remember to perform your monthly Self Breast Examination and notify your doctor of any changes, thickening or lumps that you might encounter. Compression of the breast is necessary to obtain the best possible views of the inside of your breast with the least amount of radiation. This kind of compression, while briefly uncomfortable, is better for you in the long run. It helps us take much clearer x-rays of your breast with much less radiation. It is important for you to realize that compression isn't dangerous and it doesn't damage breast tissue in any way. It also doesn't cause long term discomfort. The presence of an implant poses a special situation for mammographic technique and interpretation since a portion of the breast tissue may be obscured by the implant. In addition, implants are subject to complications such as the possibility of rupture, leakage, or displacement during compression. Even though these complications are not common, you as a patient need to know that they can occur.

Please initial the correct statement: \_\_\_\_\_ I do NOT have breast implants \_\_\_\_\_ I do have breast implants

Radiation can potentially be harmful to a developing fetus. If there is any possibility that you are pregnant, this exam must be discussed with your physician and possibly rescheduled.

Please initial the correct statement: \_\_\_\_\_ I could possibly be pregnant \_\_\_\_\_ I am NOT pregnant
